ASSIST Questionnaire

Approaches and Study Skills Inventory for Students
(Short version)

This questionnaire has been designed to allow students to describe how they learn and study. The technique involves asking you questions which overlap to some extent to provide good overall coverage of different ways of studying. Most items are based on comments made by other students. Please respond truthfully so that your answers will accurately describe your actual ways of studying.

Thank you for your participation in this questionnaire.

B. Approaches to studying

The next part of this questionnaire asks you to indicate your relative agreement or disagreement with comments about studying again made by other students. Please work through the comments, giving your immediate response. In deciding your answers, think in terms of this particular lecture course. It is also very important that you answer all the questions: check you have.

5 means agree (√√) 4 = agree somewhat (√?) 2 = disagree somewhat (x?) 1 = disagree (x).
Try not to use 3 = unsure (??), unless you really have to, or if it cannot apply to you or your course.

31. I work steadily through the term or semester, rather than leave it all until the last minute. 5 4 3 2 1
I’m not really sure what’s important in lectures so I try to get down all I can.

Ideas in course books or articles often set me off on long chains of thought of my own.

Before starting work on an assignment or exam question, I think first how best to tackle it.

I often seem to panic if I get behind with my work.

When I read, I examine the details carefully to see how they fit in with what’s being said.

I put a lot of effort into studying because I’m determined to do well.

I gear my studying closely to just what seems to be required for assignments and exams.

Some of the ideas I come across on the course I find really gripping.

Before tackling a problem or assignment, I first try to work out what lies behind it.

I like to play around with ideas of my own even if they don’t make very far.

When I finish a piece of work, I check it through to see if it really meets the

Often I lie awake worrying about work I think I won’t be able to do.

It’s important for me to be able to follow the argument, or to see the reason behind things.

I don’t find it at all difficult to motivate myself.

I like to be told precisely what to do in essays or other assignments.

I sometimes get ‘hooked’ on academic topics and feel I would like to keep on studying

C. Preferences for different types of course and teaching

Try not to use 3 = unsure (??), unless you really have to, or if it cannot apply to you or your course.
